Chapter 448: The Creation of the Netherworld

A Realm of Eternal Imprisonment

Sung Jin-Woo, the True Absolute One, saw the need for a realm dedicated solely to the containment of those who defied the divine order and posed a threat to creation. No longer would the Godverse bear the burden of housing prisoners, for their presence was a stain on its sanctity. Thus, he created a new realm—the Netherworld.

The Netherworld's Location and Nature

1. Position in the Multiverse:
The Netherworld was placed at the very bottom of the multiverse, far beneath the Heavenly Realm, Nocturne Abyss, and even the Shadow Abyss. It was isolated, unreachable by ordinary means, and hidden from all but the most powerful beings.

2. Environment:
The realm was a vast, cold, and desolate expanse. Darkness enveloped every corner, broken only by faint, eerie glows from the crystalline structures that held the essence of those imprisoned within.

Atmosphere: The air was still and heavy, filled with the weight of despair. No sound echoed, and time seemed to move slower, as if the very concept of freedom had been stripped away.

Landscape: The terrain was jagged and barren, with endless black chasms and frozen plains. Rivers of shadowy ichor flowed through the realm, their presence a constant reminder of the prisoners' separation from the light.

3. Desertion and Neglect:
The Netherworld was designed to be devoid of life and warmth. It was a place of eternal silence, where even the whispers of hope could not survive.

Leadership of the Netherworld

Sung Jin-Woo assigned Amenadiel, one of his Dark Archangels, to oversee the Netherworld. As a being of immense power and unwavering discipline, Amenadiel was the perfect warden for this desolate prison.

1. Amenadiel's Duties:

To ensure the security of the Netherworld and prevent any escape.

To oversee the transfer of prisoners from the Godverse to their new cells within the Netherworld.

To maintain order and enforce the realm's strict laws.

2. Dark Angels' Role:
Amenadiel was accompanied by an elite force of Dark Angels, handpicked for their loyalty and strength. These guardians patrolled the Netherworld, ensuring that no prisoner could exploit any weakness. Their presence was both a deterrent and a constant reminder of the Absolute One's authority.

The Great Transfer

Sung Jin-Woo decreed that all prisoners held within the Godverse and other realms would be moved to the Netherworld.

1. The Process:
The transfer was a monumental event, carried out with precision and efficiency.

The Shadowkin Lords and Dark Apostles worked alongside the Dark Angels to safely transport prisoners, using massive shadow gates to reach the Netherworld.

Each prisoner was bound by divine chains forged by Sung Jin-Woo himself, ensuring their compliance.

2. The Cells of the Netherworld:

Each prisoner was confined within a Crystalline Obelisk, a magical construct designed to suppress their powers and bind their essence.

The obelisks were scattered across the Netherworld, each isolated from the others to prevent communication or collaboration among the prisoners.

The Purpose of the Netherworld

Sung Jin-Woo addressed his Divine Triad and celestial followers as the Netherworld was completed:

"This realm is a testament to the balance we must maintain. It is not created out of malice but necessity. Those who have defied the divine order and threatened the harmony of creation will find their place here. The Netherworld shall stand as a reminder that justice is not to be taken lightly."

Amenadiel's Oath

Standing before the Divine Scepter of Dominion, Amenadiel swore his allegiance to Sung Jin-Woo and his duty as the Warden of the Netherworld:

"I, Amenadiel, pledge my existence to the service of the Absolute One. This realm shall remain sealed, and none shall escape my watch. By your will, I shall guard this prison until the end of eternity."

A Realm Forgotten

With the creation of the Netherworld, the multiverse grew more orderly. The realm itself, cold and abandoned, became a place no one wished to remember, its very existence erased from mortal and divine memory alike, save for those entrusted with its secrets.

The prisoners, stripped of their freedom and isolated in the desolate abyss, were left with nothing but their regrets and the unyielding silence of the Netherworld.
